### About me

Hello, I'm Matt. I'm a full-stack developer with more than a year of experience. I enjoy building dynamic sites & apps, and my focus is React (Next.js). My goal is to simplify complex challenges and engaging digital experiences.

### Skills

HTML

CSS

Javascript

React

Typescript

Tailwind CSS

Next.js

MongoDB

Prisma

Vite

Github

Framer

Figma

Ableton Live

### Experience

#### Self-Directed Learning Full-Stack Development

2023 - Present

- Developed responsive React.js web applications, focusing on dynamic UIs and user-centric design.
- Built full-stack projects with Next.js, enhancing performance and integrating with backend services.
- Implemented UI designs into functional, engaging web experiences with an emphasis on accessibility.
- Crafted a comprehensive task management app, demonstrating frontend/backend synergy and responsive design.
- Deployed live, scalable web solutions with a strong understanding of modern web technologies.

#### Intensive Programming Bootcamp (Piscine 42)

2023 | 42 School | Paris

- Gained proficiency in low-level programming with C and C++, and developed a strong understanding of shell scripting.
- Collaborated on complex projects, honing skills in code efficiency, algorithmic thinking, and teamwork under high-pressure scenarios.
- Skillful in rigorous peer-reviewed coding exams, showcasing adaptability and continuous learning.

#### Web Development Training

2022-2023 | OpenClassroom | Remote

- Mastered responsive web design using HTML/CSS, ensuring seamless user experience on all devices.
- Proficient in JavaScript for dynamic web content, form handling, and DOM manipulation.
- Tailwind
- Utilized Git and GitHub for version control and efficient project collaboration.

#### Bachelor of Sound Engineering

2019-2022 | SAE Institute | Paris

- Acquired in-depth knowledge of sound theory, audio signal processing, and the role of sound in interactive media.
- Mastered the technical aspects of sound design, including advanced synthesis, audio normalization, and signal flow management.
- Engaged in multiple audio production projects, overseeing the recording, editing, mixing, and mastering phases.

### Ongoing side projects

#### Room Task

Continuously enhancing a task management app with new features and a focus on user experience improvements.

#### Weather Web App

Developing a full-stack weather forecasting app with Next.js, React, Tailwind CSS, and the OpenWeatherMap API for real-time data.

#### API Browser Extension

Developing and implementing the design of a browser extension for the efficient management, storage, and inspiration of online visual assets.
