About me

Hello, I'm Matt. I'm a full-stack developer with more than a year of experience. I enjoy building dynamic sites & apps, and my focus is React (Next.js). My goal is to simplify complex challenges and engaging digital experiences.

Skills

HTML   CSS   Javascript

React   Typescript

Tailwind CSS   Next.js

MongoDB   Prisma   Vite

Github   Framer   Figma

GSAP   Three.js

Ableton Live

Experience

Self-Directed Learning Full-Stack Development

2024 - Present | Remote

- Developed responsive React.js web applications, focusing on dynamic UIs and user-centric design.
- Built full-stack projects with Next.js, enhancing performance and integrating with backend services.
- Implemented UI designs into functional, engaging web experiences with an emphasis on accessibility.
- Crafted a comprehensive task management app, demonstrating frontend/backend synergy and responsive design.
- Deployed live, scalable web solutions with a strong understanding of modern web technologies.

Intensive Web Development Bootcamp (RNCP level 6)

Ironhack France | 2023 | Paris, France

- Solidified fundamental web development skills by mastering HTML, CSS for design, and Git for version control.
- Developed interactive user interfaces with advanced JavaScript, ensuring responsiveness and dynamic content.
- Expanded expertise to include full-stack development, integrating React for frontend and NodeJS with ExpressJS for backend solutions.
- Built and maintained data-driven applications, effectively utilizing MongoDB for database management.
- Completed hands-on projects that simulated real-world challenges, sharpening technical skills and problem-solving abilities.

Intensive Programming Bootcamp (Piscine 42)

42 School | 2023 | Paris, France

• Gained proficiency in low-level programming with C and C++, and developed a strong understanding of shell scripting.

• Collaborated on complex projects, honing skills in code efficiency, algorithmic thinking, and teamwork under high-pressure scenarios.

• Skillful in rigorous peer-reviewed coding exams, showcasing adaptability and continuous learning.

Bachelor of Sound Engineering

SAE Institute | 2019-2022 | Paris, France

• Acquired in-depth knowledge of sound theory, audio signal processing, and the role of sound in interactive media.

• Mastered the technical aspects of sound design, including advanced synthesis, audio normalization, and signal flow management.

• Engaged in multiple audio production projects, overseeing the recording, editing, mixing, and mastering phases.
